Professional Experience

Crosmos

Nov 2025 – Present

Co-founder & CTO

Remote

- Built organisational memory for enterprise AI: a monotonic temporal knowledge graph that gives agents reliable, auditable company context in place of stateless RAG.
- Built product and backend workflows around hybrid retrieval, memory spaces, source ingestion, graph exploration, and audit history, connecting the console experience directly to the memory engine.
- Secured 2 paying enterprise customers, a \$35K LocalHostHQ grant with founders-program acceptance, and \$15K in Anthropic and OpenAI startup credits.

Key Projects

Crosmos - Context Infrastructure | TypeScript, Next.js, MCP, Knowledge Graphs, Bun

- Shipped a 10-repository ecosystem around a temporal knowledge-graph memory engine: web console, landing site, docs, shared UI, graph visualization, official MCP server, SDKs, and agent integrations.
- Built the product surface end-to-end: memory spaces, sources, organization settings, graph exploration, API-key management, visibility controls, and chat/playground experiences.
- Authored agent workflow plugins for Claude, Codex, and opencode, wiring memory recall and session capture into developer tools without requiring manual memory commands.

torrent-tui | TypeScript, Bun, BitTorrent, DHT, UDP/HTTP Trackers

- Built a terminal BitTorrent client with torrent parsing, peer handshakes, DHT/LSD discovery, HTTP/UDP tracker coordination, magnet resolution, and resumable session storage.
- Shipped as an npm package with 1000+ downloads and 100+ GitHub stars, backed by CLI workflows, man-page packaging, smoke tests, benchmarks, GitHub release flow, and protocol-level tests.

Zenith - Ticketing and Workflow Platform | Next.js, TypeScript, Supabase, Playwright

- Built an event operations dashboard with automated ticket generation, email templating, and scanner-based participant validation.
- Used by college clubs to host events with 4000+ participants, supporting multi-device scanning workflows and database-backed participant state synchronization.

Technical Skills

Languages: TypeScript, JavaScript, Python, C++, SQL, HTML/CSS

Frontend & Full Stack: Next.js, React, Node.js, Express.js, Hono, Tailwind CSS, shadcn/ui

Backend & APIs: REST APIs, MCP, authentication/session flows, PostgreSQL, Supabase, Redis, Drizzle, Zod

Systems & Tools: Git, GitHub, Bun, Turborepo, Playwright, CLI tooling, npm packaging

AI Engineering: AI SDK, persistent agent memory, knowledge graphs, semantic/graph retrieval workflows

Education

Vellore Institute of Technology

September 2023 – July 2027

Bachelor of Technology (B.Tech), Computer Science Engineering Core – **CGPA: 8.3/10.00**

Bhopal (M.P.)

St. Xavier Convent School

April 2022

Class XII (Senior Secondary Examination), ICSE – **Aggregate: 78.2%**

Lucknow (U.P.)

Lucknow Public School

April 2020

Class X (Secondary Examination), CBSE – **Aggregate: 92.5%**

Lucknow (U.P.)
